Education

The University of Pennsylvania — Philadelphia, Pennsylvania — 2015 – 2019 (*expected*)

Candidate for B.A. in Biology with concentration in Computational Biology, a cross-disciplinary degree across the College and Engineering School.

Stuyvesant High School — Manhattan, New York — 2012 – 2015

4 year Specialized High School program, specializing in math and science. Received highest honors in Computer Science.

Experience

The Daily Pennsylvanian — University of Pennsylvania

Director of Web Development — *Spring '15, Current*

Building a web department for one of United States' largest student-run newspapers. Assisting in moving a 132 year old paper to a web-first mindset. Responsibilities include brainstorming and designing engaging webpages, moving old sites to robust, cloud-based architecture, and managing a staff of 10 students. Successfully launched redesign of theDP.com which reduced load times by up to 50%. Currently working to build a number of microservices to add new features to the DP.

Board of Directors Member-at-Large — *Spring '15, Current*

Elected to sit on the Board of Directors, a body consisting of five voting student and four voting alumni members. Participate in high level discussions regarding the company, and aid in strategic planning as the company moves from a print publication to a modern media organization.

Motivate International — Brooklyn, New York

Engineering Intern — *Summer '16*

Performed real-time data analyses to optimize bike share programs in 12 cities. Created dashboards to help dispatchers make intelligent decisions about bicycle rebalancing. Sat on standards body for GBFS, a general bike share feed specification being implemented by 47 bike shares and hundreds of apps globally. Built map generation service using our GBFS APIs to allow the marketing team to quickly build interactive live maps.

PennLabs — University of Pennsylvania

Engineer — *'15-'16 School Year*

Created and maintained various student-run APIs, apps, and services beneficial to the student community, including a university-endorsed mobile app, and registrar, dining, and transit APIs. Worked closely with the student government and Penn administration to create content to improve student life, while promoting the open-source community.

SumAll — Manhatatan, New York

Engineering Intern — *June '15 – Aug '15*

Worked at a venture-backed startup environment helping maintain a legacy codebase while working towards a release of a new product. Implemented and iterated upon web designs based on user feedback. Learned new technical skills, such as user interface design and Vue.js MVVM usage, as well as valuable interpersonal skills.

East Side Animal Hospital/LIC Veterinary Center — Manhattan, New York & Queens, New York

Intern — *Summer '13 & Summer '14*

Trained and worked in multiple aspects of veterinary medicine, including animal handling (feline, canine), client relations, and surgeries. Observed, assisted in, and performed hematological analyses and urinalyses. Under supervision, prepared and administered injections and prescriptions.

Selected Projects *Academic and Personal*

Please see my website & github for additional work.

***Daily Pennsylvanian* Web Redesign** Bottom up redesign and reengineering of The Daily Pennsylvanian's website focusing on aesthetics, speed, and readability.

Various Projects for *The Daily Pennsylvanian* Created a number of web projects for the paper, See *Your courses, deconstructed* as an example.

Vynl Single-page web-app for making collaborative party playlists. Frontend: Bootstrap.css, MVC undecided (currently marionette). Backend implementation using node.js. Featured as "Hack of the Month" for the August 2015 New York Tech Meetup.

Outquote A super simple, dependency-free text card generator for social media posts. Uses the HTML5 canvas. Open source.

Technical Skills

Programing Languages, Frameworks: JavaScript (NodeJS, VueJS, Underscore, D3, jQuery), CSS/Sass, HTML, Python, Java, LaTeX, Obj-C, PHP, .NET MVC, O-Caml

Toolset: Git VCS, Database Querying (SQLite, MySQL, MongoDB), emacs

Design: Photoshop, Illustrator, Sketch, AutoCAD

Interests & Hobbies

Non-exhaustive, Alphabetically: Amateur radio (call-sign KD2FLO), competitive coding & hackathons, (vintage) electronic restoration, graphic design, hiking, human-computer interaction, photography (digital, analog), piano, sailing, skiing, transportation, typography, UI/UX design, woodworking
